

Dual Countertop Filter

Featuring KDF® - "today's precious metal for water purification"

Save hundreds of dollars with the amazing Slim-Line Dual Multi-Stage, anti-microbial, countertop water purification system. It features replaceable cartridges of KDF, "today's precious metal for fluid purification", combined with Coconut Shell granular activated carbon, and a Diatomite Ceramic for extreme micro-filtration. Diatomite is "the most natural filtering substance ever known." This combination is the best news of the 20th century for those who want affordable, cost-effective, and highly efficient water treatment of tap water. The Dual Countertop effectively reduces or eliminates both organic and inorganic pollutants, including, but not limited to, arsenic, bacteria, cadmium, chlorine, detergents, fertilizers, fluoride, lead & mercury, parasites, PCB's, radon, and THM's.

The Dual Countertop:

- Provides pure, healthy water right from your faucet
 - Use with municipal or clean well water supplies
 - It only requires 8 3/4 inches of counter space
- Treats up to 10,000 gallons of tap water.
 - Removes chlorine, heavy metals and toxic chemicals
 - Controls and Destroys harmful microorganisms
 - Connects easily to the kitchen faucet
 - Low maintenance (cartridge replacement only)

The lifetime stainless steel spout and chrome plated brass connector & diverter meets National Sanitation Foundation (NSF) 42, 53 and 61 Protocols

FULL ONE-YEAR WARRANTY
