

Triple Undercounter Filter

Featuring KDF® - "today's precious metal for water purification"

Enjoy safe, clean, healthy water for 2-3 cents per gallon with the economical Heavy Duty "Triple" Multi-stage (5) anti-microbial, UnderCounter Water Treatment System - excellent for any municipal or clean well water supply.

The "Triple" features three replaceable cartridges, the first being a 5 micron Sediment Pre-filter to remove initial influent particulate matter 5 micron and above, in size; the second, containing KDF, "today's precious metal for water purification" and Alumina, the one sure way to eliminate dangerous fluoride and arsenic from tap water; and thirdly, the latest development in "extreme microfiltration" (0.2 micron, absolute), an all-carbon filter that combines the fine particulate reduction of a traditional ceramic filter with the chlorine, taste and odor reduction of activated carbon.

Fibers are manufactured using extruded activated carbon particles, fused into a uniform block with enhanced adsorptive capacity and efficiency. Water flows in a radial (outside to inside) direction, providing increased dirt capacity and low pressure drop. Unlike regular activated carbon filters, these cartridges will not channel or bypass, due to the extreme uniformity of their extruded activated carbon core. This cartridge is fully cleanable with "just the wipe of a sponge", and is manufactured using FDA-compliant materials.

The Heavy Duty Triple UnderCounter:

- Removes Heavy Metals
- Removes Chlorine, and other Toxic chemicals
- Removes both organic and inorganic pollutants
- Destroys and Removes deadly microorganisms
- Does *not* remove minerals or electrolytes
- Colloidalizes minerals for better assimilation
- Comes mounted on a wall bracket for easy installation
- Comes complete with "third faucet" installation kit
- On-demand water, and Requires no electricity
- Treats up to 20,000 gallons of tap water
- Provides virtually maintenance-free service

FULL ONE-YEAR WARRANTY

Retail Price: \$399⁰⁰ + S&H **Special Price: \$289⁰⁰ + S&H**

Replacement Cartridges Available:

- Heavy Duty 5 micron sediment pre-filter - \$9⁹⁵
- KDF/Alumina - \$59⁰⁰
- Extruded Block Carbon - \$55⁰⁰
